

## Preparation for Flea Treatment Requirements

- Remove Clothing and bedding fabric from floor and launder. Keep separate until after treatment.
- Vacuum and mop all floors, furniture, and fabric areas thoroughly and discard vacuum bags after use
- Vacuum couch, furniture, and chair cushion and leave pulled up if able
- Remove any small items and clothing from floor and any breakables off of furniture
- Pets and occupants removed from treatment area/unit during the treatment.
- Stay off floors for a minimum of 2 hours after treatment
- ❖ Please note that our materials do not penetrate into certain life cycle stages of the flea so you will see more fleas after treatments have been completed.
- ❖ There are residual materials applied in your home that are designed to impact and eliminate the flea populations.
- ❖ Please continue to vacuum carpets and discard contents until treatments are over and no fleas are seen.
